Instructions
RACs add info to columns with Yellow headings on the Data sheet
L/C add comments in columns with Blue headings on the Data sheet

The table was designed to have a separate row for each Product contributor. Please add a separate row for each contributor for each Product so we can sort / filter by organization.
There will be some (maybe a lot in some cases) of information we don't have right now. Just enter what you have and we'll add the rest at a later time.

Description of Columns - hopefully most are intuitive
We've tried to pre-populate as much info as possible to make it easier for RACs Feel free to revise any of the pre-populated info that is incorrect.
Output Number - These are just created from the RA number. Please enter actual numbers if your NRP has numbered
Product Contact (LC nomination) - If you have a different proposed Product Contact (this is the scientist that will lead the Product development / delivery) than the RACT nomination or if the Product Contact field is blank, , enter your nominee. Consider what other Products the potential nominee might be proposed to lead, as well as leadership
Product Priority - Identify whether, relative to other Products, the Product is a high, medium or low priority. The should be based on how the Product contributes to the Output, and how the Product reponds to a partner need. Choose reevaluate for Products that, in your opnion, don't have clear linkages to StRAP Outputs or more closely align with
Can you Produce the Product? - Given your staffing and potential extramural resources available can you produce the Product or the portion of the Product for which your team will have responsibility (yes, no, maybe - if maybe provide
Product FY20 $K Needs from LC - The amount the specific division / branch needs to receive for their part of the Product, not necessarily the total needs for the Product, unless all the effort for that Product is envisioned within one
